

Parenting Wikipedia Parenting or child rearing is the process of promoting and supporting the physical, emotional, social, and intellectual development of a child from infancy to adulthood. Parenting refers to the intricacies of raising a child and not exclusively to the biological relationship. The most common caretaker in parenting is the biological parent.

Parenting styles Wikipedia According to a literature review by Christopher Spera, Darling and Steinberg suggest that it is important to better understand the differences between parenting styles and parenting practices. Parenting practices are defined as specific behaviors that parents use to socialize their children, while parenting style is the emotional environment that parents create for their children.
