Reflex Wikipedia A reflex, or reflex action, is an involuntary and nearly instantaneous movement in response to a stimulus

A reflex is made possible by neural pathways called reflex arcs which can act on an impulse before that impulse reaches the brain. Reflex physiology Britannica Reflex Reflex, in biology, an action consisting of comparatively simple segments of behaviour that usually occur as direct and immediate responses to particular stimuli uniquely correlated with them. Infant reflexes MedlinePlus Medical Encyclopedia The presence and strength of a reflex is an important sign of nervous system development and function Many infant reflexes disappear as the child grows older, although some remain through adulthood A reflex that is still present after the age when it would normally disappear can be a sign of brain Reflex Regional Transit Authority rtamichigan REFLEX is being replaced with FAST Starting January , , SMART will begin operating its FAST service FAST is a high frequency, limited stop service that can quickly and easily connect to your favorite destinations along Gratiot, Woodward and Michigan Avenues.
