LightBot All Ages Friendly LightBot was designed with first time coders. It's been played by over million kids and has been used by tens of thousands of teachers worldwide.

Fluorescent lamp Wikipedia A fluorescent lamp, or fluorescent tube, is a low pressure mercury vapor gas discharge lamp that uses fluorescence to produce visible light. An electric current in the gas excites mercury vapor, which produces short wave ultraviolet light that then causes a phosphor coating on the inside of the lamp to glow.

Leeds BBC Weather Outlook for Wednesday to Friday Wednesday will see a good deal of sunshine, with light winds and some afternoon fair weather cloud bubbling up.

Incandescent light bulb Wikipedia An incandescent light bulb, incandescent lamp or incandescent light globe is an electric light with a wire filament heated to such a high temperature that it glows with visible light incandescence.
