If you watched the hand of a baby panda grow, you would see that the thumb develops from a wrist bone. The panda thumb and the human thumb don't grow from the same bones. This is evidence that they are analogous structures. The Pandas Thumb Stephen Jay Gould Essay With a touch of humor, geology, evolutionary theory, biology, cartoon characters and even some references to baseball, The Panda's Thumb definitely makes excellent reading for people with all types of interests. The old cliché, Don't judge a book by its cover, or in this case, title Giant Panda National Geographic The giant panda has an insatiable appetite for bamboo. A typical animal eats half the day a full out of every hours and relieves itself dozens of times a day. It takes pounds of bamboo to satisfy a giant panda's daily dietary needs, and it hungrily plucks the stalks with elongated wrist. The Panda's Thumb Christian Forums Apr, The Panda's thumb is actually not a thumb at all. It is NOT a th finger. It is simply a pad that was adapted to serve the special needs of the Panda. The bone under that pad in the Panda became bigger because the Panda needed it to be bigger to better handle bamboo leaves. Red Panda Printout EnchantedLearning The Red Panda Ailurus fulgens is a shy, long-tailed mammal that lives in cold, high altitude mountain forests in Nepal, Burma and central China. Also known as the Lesser Panda, it is the size of a house cat. This endangered species is closely related to raccoons than to Giant Pandas.
